

**400 computer
companies want
to sell you the latest,
fastest, hottest,
most advanced
system on the planet.**

Computers for Kids Over 60 was written after years of working with older adults to help them learn to use computers. Now in its fourth edition, there are over 20,000 copies in print! There's a good reason for its popularity. *Computers for Kids Over 60* explains what the "computer revolution" is all about, and invites you to join in the fun and excitement. Drawing on the experiences of thousands of older adults, this remarkable book will help you understand, as they have, how easy it is to learn to use computers. In plain English, *Computers for Kids Over 60*, will open you up to computers and open computers up to you. And its yours FREE, simply by dropping the reply card in the mail.

Suddenly computers aren't so scary.

Computers for Kids Over 60 introduces you to personal computers and explains what they are and how to use them. It will help you see how owning a computer can help you organize your life in ways you never thought possible. This is no skimpy

**The book that's been read
by thousands of folks like you!**

Computers for Kids Over 60 is the work of a non-profit organization called SeniorNet. SeniorNet was founded in 1983 to help older adults learn to use computers. Today, there are SeniorNet learning sites throughout the United States. But SeniorNet is more than that.

As a member of SeniorNet, you're part of a very unique community. You can connect your computer (through your ordinary phone line) to the computers of thousands of other SeniorNet members. On SeniorNet, you can send messages to friends around the country, participate in conferences and clubs, and share information. It lets you *become a vital part of your own computer generation.*

Computers for Kids Over 60 gives you complete details on SeniorNet. So don't delay. If you've been wondering what all the fuss, and fun, is about, get your copy today! There has never

Introducing Computers for Kids Over 60.

The best book ever on computers—written for people who were born before television.

pamphlet. *This is a well-thought-out book with photographs and over 80 pages.* One look at the Table of Contents will give you an idea of what life can be like owning a personal computer. You'll discover:
